

Mission Statement *2025*

Our mission is to provide excellence in education by giving individual attention to our students in a welcoming environment where the challenge of discovering coexists with the pleasure of learning.

We aim to develop inquirer, knowledgeable and supportive students who contribute to a better world through understanding and respect. We seek to form global citizens who are prepared to positively impact the world around them.

Escola Nova by SIS encourages its students to become active, upright, curious, creative and critical learners. The values transmitted in the school will be part of each student throughout life, preparing them to respect differences and deal with different points of view.
